Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-8, 10 and 11 are rejected under 35

U.S.C. 102(b) as being anticipated by Hama (US Patent No. 5,592,337, from IDS).

Hama discloses an apparatus for fixing a reflection mirror for a laser scanning unit, comprising a reflection mirror (Fig. 3, 17), a frame receiving and supporting the reflection mirror (27, 20), at least one fixing piece (33) disposed in the frame and each having a connection surface which is slanted at a predetermined angle so as to be in tight contact with a reflection surface of the reflection mirror (a hump on 33), at least one support block supporting a portion of a reverse surface of the reflection mirror (28a) and at least one clamp for clamping the at least one fixing piece and the reflection mirror together in order to tightly contact the reflection mirror and the connection surface of the at least one fixing

piece (30). At least one support block is shaped in a triangle having a predetermined slant surface for contacting the portion of the reverse surface of the reflection mirror (see shape of 28a in Fig. 3). The frame has a bottom surface with which the at least one support block is integrally formed (column 7, lines 14-16).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 2 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hama.

Hama discloses the claimed invention as set forth above except that the at least one fixing piece is integrally formed with the bottom surface of frame. It would have been obvious to one of ordinary skill in the art to make these two elements to be integral for the purpose of tightly securing the mirror to the housing.

Response to Arguments

5. Applicant's arguments filed 6/6/05 and 6/7/05 have been fully considered but they are not persuasive. Applicant argues that the rejection does not identify the fixing piece.

Applicant is directed piece 33 in Fig. 3. Also, applicant argues that no where in the specification of Hama disclose a clamp for clamping at least one fixing piece and the reflection mirror together. However, applicant is reminded that the element 30 serves the same purpose as the clamp of the present invention. Therefore, the element 30 is a clamp. The element 28a is shaped in a triangle as shown in Fig. 3, the claim does not precisely recite the block is a triangle, but rather recite "is shaped in a triangle". Therefore, the rejection is deemed proper.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened

Art Unit: 2872

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
